EDUCATION

Central Mindanao University

Maramag, Bukidnon

Bachelor of Science in Information Technology, **Cum Laude (GWA: 1.546)**

2026

Specializes in Software Development

- **Capstone Project:** BUKTRACK: A Bus Information and Tracking System For Commuters In Bukidnon
 - Designed and developed a commuter- and conductor-facing mobile application with an admin web system that delivers timely bus information, route visibility, and operational transparency by integrating GPS-based tracking concepts, role-based access control, and database-driven reporting to address communication gaps in public transportation.
- **Relevant Coursework:** Software Engineering, Web Systems and Technology, Mobile Application Development, Fundamentals of Database Systems, Integrative Programming and Technologies

WORK AND LEADERSHIP EXPERIENCE

OBX Solutions Technology Inc.

Cagayan de Oro City, Misamis Oriental

Full Stack Developer Intern

Feb 2026 - May 2026

- Developed full-stack features for two client-facing systems using Laravel, React, TypeScript, and Shadcn/ui contributing across backend API design, frontend implementation, and UI/UX delivery.
- Participated in a stakeholder assessment meeting with Metro Kidapawan Water District, translating client requirements into system specifications and ensuring alignment between deliverables and operational needs.

The Blazer 2026 – Official Yearbook Publication of Central Mindanao University

Musuan, Maramag, Bukidnon

College Editor

Mar 2025 - present

- Led editorial planning and content execution for the College of Information Sciences and Computing section, ensuring on-time delivery and adherence to university publication standards.
- Reviewed and approved 300+ student profiles and records, cutting revision cycles by enforcing a structured data-accuracy process that reduced last-minute layout corrections ahead of the final print deadline.
- Coordinated directly with senior editors, photographers, and layout teams to deliver publication-ready materials within fixed production timelines.

College of Information Sciences and Computing Student Council (CSCo)

Musuan, Maramag, Bukidnon

Vice-Chairperson (Internal)

July 2024 - June 2025

- Led and co-led 20+ student-centered programs, including new academic and professional initiatives that expanded student engagement within the college.
- Oversaw internal operations covering documentation workflows and financial coordination, improving processing turnaround and record consistency.
- Acted as a central coordinator between officers, faculty, and student bodies, enabling more efficient planning and execution of college-wide activities.

College of Information Sciences and Computing Student Council (CSCo)

Musuan, Maramag, Bukidnon

Associate Treasurer

June 2023 - July 2024

- Administered and documented a ₱500,000+ operating budget supporting programs for 500+ students, ensuring accurate allocation and financial control.
- Planned, budgeted, and reported on 20+ student activities, maintaining full compliance with council financial policies and audit requirements.
- Designed and implemented structured financial documentation procedures that improved transparency, reduced reporting errors, and strengthened audit readiness.

PROJECTS

Megaworld Homes — Real Estate Marketing Platform (megaworldhomes.com)

Sole Developer (Freelance) | Next.js, React, TypeScript, Tailwind CSS, Resend, Vercel

- Architected and launched a production-grade, multi-property real estate platform as sole freelance developer delivering a project-explorer landing page and fully-featured property microsites on Vercel.

- Engineered a scroll-driven, fully responsive UI without external animation libraries, implementing Intersection Observer-based animations, CSS keyframe sequences, and a cinematic splash screen, while integrating Resend transactional email routed through a Next.js API handler for live client inquiry delivery.
- Implemented production SEO infrastructure including JSON-LD structured data, per-route Open Graph metadata, sitemap generation, and Vercel Analytics alongside next/image WebP optimization and next/font custom loading for performance-ready deployment.

Metro Kidapawan Water District — Human Resource Information Management System

Full Stack Developer | Laravel, React, TypeScript, Shadcn/ui

- Led full-stack development of the Payroll Processing module for Metro Kidapawan Water District's Human Resource Information Management System, covering a 5-step payroll pipeline from period setup to finalization.
- Built the backend API and business logic using Laravel, and implemented the frontend UI with React, TypeScript, and Shadcn/ui components — including payroll period setup, employee loading, computation, floor check, and post-and-finalize workflows.

PRDP Scale-Up Mindanao Website (prdpmin.online)

Full Stack Developer | Laravel, React, TypeScript

- Contributed as a Full Stack Developer to the PRDP (Philippine Rural Development Project) Scale-Up Mindanao web platform, focusing on frontend design and implementation of the public-facing landing page.
- Implemented editable content management functionality across multiple pages, enabling administrators to update mission updates, subproject information, reports, and gallery content dynamically.
- Delivered a responsive, polished UI aligned with World Bank implementation support mission requirements, supporting the 5th WBI5m event (April 15-17, 2026).

BUKTRACK: A Bus Information and Tracking System for Commuters in Bukidnon (Capstone Project)

Main Developer | Flutter, Dart, Firebase, Google Maps API

- Developed Android applications for commuters and conductors plus a web-based admin dashboard, supporting real-time route updates and multi-role user management.
- Integrated Google Maps API and Firebase to enable live bus location tracking and cloud-synced data across users.

SKILLS & INTERESTS

- **Programming Languages:** Python, Java, Javascript, PHP, Dart, SQL
- **Frameworks and Libraries:** Flutter, Laravel, React, Vue.js, Next.js, Node.js
- **Databases:** MySQL, SQLite, PostgreSQL, Firebase, Supabase
- **Tools:** Visual Studio Code, Android Studio, Git, Github, Figma, Photoshop
- **Core Competencies:** Full-stack web and mobile application development | System design, documentation, and implementation | Leadership, coordination, and project execution in team-based environments

AWARDS, CERTIFICATIONS & TRAININGS

Honors & Recognition
